

# 2018 December Final Release

December, 2018

## Release Notes for December Maintenance Release

Change Request/Defect	Requestor	Description
Update deprecated	John Doe	Description: This project is listed as an example on how to setup the review apps, so for many users it will be the first example they'll see, and they'll probably setup their own system around it. So I think it would be good if the CI configuration wasn't using old deprecated variables.  State: CA, NY, TX  Systems: APIGateway, EIS
#2 Test Issue - Link in README does not work	John Doe	Description: I would like to run this example to evaluate using Gitlab CI and Cloud Foundry with our Spring Boot project but the link in the README.md generates a 404.  State: CA  Project Manager: Jane Doe
#1 Test Issue - Reduce load time	James Franco	Description: Help reduce load time in UX.  State: New York  Systems: APIGateway, ESign, EIS
